

The Marketplace for Commercial Renewable Energy Deployment

Alta Energy Summer Intern: Products & Markets

Alta Energy is THE marketplace for the deployment of renewable energy systems for commercial properties. The Company is currently hiring enterprising individuals to assist with Alta Energy's rapid growth. Ideal candidates should have a background in finance, economics and/or environmental engineering, and an interest in renewable energy.

Primary Focus: Intern will assist Alta Energy's Products & Markets group and expand the knowledge of the Company's renewable energy ecosystem. The position will involve research on various aspects of renewable energy, with a primary focus on solar.

Responsibilities are as follows and are directed by the VP of Product & Markets:

- Internet as well as phone research on various issues related to solar
- Identify and research potential renewable energy ecosystem partners
- Assistance with product development, both new and existing
- Ecosystem partner interface as requested
- There may be some general administrative work such as photo copying or data entry

Skills Required: Word, Excel, PowerPoint, Internet research. Strong inter-personal and communication skills required. Must be a problem solver and independent thinker with good follow through.

Education Level: Minimum College Sophomore, pursuing BS or BA degree

Hours: 40 hours per week/Monday-Friday at Alta Energy's San Mateo office

Office Location: 2929 Campus Dr. Suite #150, San Mateo, CA 94403

Compensation: \$10-12/hr
